

Terms and Condition on the use and supply of the MyGTAP Framework

Scope of Terms and Conditions

These terms and conditions govern the use of the MyGTAP framework (hereby referenced as “the package” and including both the multiple and single household variants) and any derivates. The MyGTAP framework is a set of data and model programs that allows the user to remove the regional household and add multiple households and additional factors into a version of the GTAP Data Base and model. The MyGTAP framework was developed as part of a joint project between the ImpactECON, the Center for Global Trade Analysis, Purdue University and the World Bank. The framework is distributed and maintained by ImpactECON LLC.

Specifically, the MyGTAP Framework includes files and programs related to:

- MyGTAP Multiple Household data tool: this is a set of data and programs that allow you to include multiple households and additional factors into the GTAP Data Base for one special region.
- MyGTAP Multiple Household Model and RunGTAP application: a program containing the MyGTAP model and auxillary files that can be combined with your MyGTAP database into a RunGTAP application.
- MyGTAP Single Household Model and RunGTAP application: a program containing the MyGTAP model, auxiliary files and additional data that can be used to convert the GTAP Data Base directly into a MyGTAP application with one private household and separate government in all regions.

By copying or using any part of the MyGTAP Framework you are agreeing to these terms and conditions. If you do not agree to these terms and conditions, do not copy or use.

Conditions

The MyGTAP framework and any derivative aggregations, is a derivative of the GTAP Data Base and hence is governed by the license conditions of the GTAP Data Base. Licensees of the MyGTAP framework must hold a relevant and valid GTAP license and in no case will the MyGTAP framework license substitute for a valid GTAP Data Base license. It is the sole responsibility of the users to ensure they are not in violation of either license agreement—separately and jointly.

The MyGTAP Framework is provided “as is”. ImpactECON, LLC makes no warranties (express or implied) that the data, associated programs and documentation are free from error, or are consistent with the standard of merchantability, or that they fit for the particular purpose intended.

Licensees are free to make changes to the data, but at no time shall the modified database become the property of the licensee.

The license holder shall not make the package or data available over a network.

If any provision of these terms and conditions is, or is found to be, unenforceable under applicable law, that will not affect the enforceability of the other provisions of these terms and conditions.

If a provision of these terms and conditions is determined by any court or other competent authority to be unlawful and/or unenforceable, the other provisions will continue in effect. If any unlawful and/or unenforceable provision would be lawful or enforceable if part of it were deleted, that part will be deemed to be deleted, and the rest of the provision will continue in effect.
